Black Box Testing

For Team 21, Readly

Articles (ART)

Defect No.	Defect Description	Defect Severity	Test Case No. Description
ART001	Upvote Button increments the downvote count instead of upvote count	2	ART002
ART002	Downvote button increments upvote count instead of downvote count	2	ART003
ART003	Commenting does not immediately add the comment to the page and instead an `alert` dialog is displayed. However, after reloading the page the comment appears	2	ART005
ART004	Clicking on a link on the favorites page does nothing instead of redirecting you the external webpage	1	ART008

ART005	News sources does not sort links in favorite page	3	Clicking on a news source on the favorite page should restrict links to the aforementioned news source
ART006	The number on the upvote and downvote buttons on the favorites is either blank or displays 'NaN'	2	Testing the accuracy of the counts on up and downvote buttons. The buttons should display the amount of votes it received, or display 0.
ART007	Clicking on the comment button brings the user to the same comment section for every article	1	ART004 The button should display the comment section specific to the article.
ART008	Clicking on the 'get more news' button on the favorites page just duplicates current articles on the page	2	Testing the functionality of the 'get more news' button. It should fetch more unique news articles and display them on the page.

ART009	The main news feed and the favorites page does not prevent the same article from being displayed multiple times	2	Testing the uniqueness of the collection of articles displayed in the list. Many articles are found to be duplicated and a user can favorite an article multiple times, leading to multiple appearances on the favorites page.
