

Team 24: Group

Higher Order Testing, Team 21: Readly

Will Huang, Zach Perry, Alex Aralis, Jeremy Lehman, Aditya Vaidyam

Performance

Defect No.	Defect Description	Defect Severity	Test Case No. Description
P001	Initial page load takes 1s+	2	NF002:28(F)
P002	Changing news sources takes 500ms+	2	NF003:28(F)

Volume

No Volume-related errors were found during higher order testing.

Stress

Defect No.	Defect Description	Defect Severity	Test Case No. Description
S001	Under 100 user load for 2 minutes 99.62% availability	3	NF007:28(F)
S002	Under 100 user load noticeable UX degradation 1s+ for the source loading.	2	NF008:28(F)

Usability

Defect No.	Defect Description	Defect Severity	Test Case No. Description
U001	Reloading the page results in vastly different list of links	2	Page should render a consistent set of links when a user reopens the page.
U002	Pressing the settings button from the favorites page does not result in switching to the settings page	3	The settings page should display after the button is pressed
U003	There is no way of navigating back to the main news feed from the favorites page	2	There should be a button available to navigate back to the main news feed without explicitly changing the url
U004	Clicking on most buttons opens a brand new tab instead of navigating to a new page	2	There should be a way to navigate to different web pages easily. (Navbar, drawer menu etc.)

Security

No Security-related errors were found during higher order testing.
